

Can payroll be a business asset?

Payroll can be much more to your business than simply paying your people

IT CAN

INCREASE PROFITABILITY

In-house payroll costs an extra **273**  per employee per year, and erodes profits through:

-  Tracking remote workers
-  Compliance issues
-  IT maintenance
-  Payroll labour costs

REDUCE RISK

37% of companies keep their payroll data in Excel¹

How will you cope if:

-  The software crashes?
-  Your people are not paid accurately or on time?
-  The person in charge of payroll falls sick or leaves?

BOOST GROWTH

Outdated systems do not support growth

How will you:

-  Cut costs?
-  Increase profits?
-  Find time to focus on what matters to your business?

SUPPORT YOUR PEOPLE

Are admin tasks taking up too much time?

Keep engagement high by:

-  Freeing up time
-  Improving job satisfaction
-  Paying your people correctly and on time

INCREASE COMPETITIVENESS

Being able to **respond to opportunities** will make you more competitive

Manual payroll systems reduce competitiveness as they are:

-  Not flexible
-  Not able to scale with business needs
-  Not easy to use
